Summary

Software Engineer II building identity and access management (IAM) services at UKG with Java, Spring Boot, and Auth0. Experience in authentication security, enterprise single sign-on (SSO), and changes spanning services, Kafka events, and database migrations.

Professional Experience

UKG · Identity & Access Management	September 2022 – Present
Software Engineer II	January 2025 – Present
Associate Software Engineer	May 2023 – December 2024
Software Engineer Intern	Joined September 2022

Engineering contributions

- **Enterprise SSO:** Contributed to SAML multi-certificate support spanning Auth0 integration, database migrations, and Kafka events, supporting certificate rotation without interrupting enterprise sign-in.
- **Certificate validation and rollout:** Contributed to certificate authority (CA) validation, feature flags, and resilience handling in the SAML certificate workflow, addressing certificate trust and controlled feature rollout.
- **Authentication security:** Contributed to security improvements for IP-based access controls in enterprise authentication flows, addressing request trust and enforcement of access policies.
- **Identity integration troubleshooting:** Worked on mobile SSO login failures involving OAuth-provider deprecation and SAML redirect flows.
- **Backend development:** Develop Java and Spring Boot applications for authentication, authorization, and user management, integrating with Auth0 as part of UKG's IAM platform.
- **Automated testing:** Write unit tests with JUnit and Mockito for Java and Spring Boot applications.
- **Continuous integration and delivery (CI/CD):** Use GitHub Actions and Docker to automate application builds, testing, and deployment.

Technical Skills

Languages & backend: Java, Python, C, Spring Boot, JPA, Hibernate
Identity & security: Auth0, SAML, single sign-on (SSO), authentication, authorization, certificate validation
Data & messaging: Kafka, database migrations, PostgreSQL, MySQL
Testing & delivery: JUnit, Mockito, GitHub Actions, CI/CD, Docker, Git, Gradle, Maven, Linux / Unix
AI development tools: Codex, Claude Code

Education

Master of Science in Computer Science	December 2025
Florida International University	
Bachelor of Science in Computer Science	May 2022
Florida International University · Magna cum laude · GPA: 3.71
